

Use Building Science to make Long-term Decisions about Energy Use

Learn from an industry expert...

**Francis Belle, President
FM Residential Design & Consulting**

At this session, Francis will speak about the long term factors to consider if you are a home owner making decisions to convert or replace heating equipment to a different fuel source such as electrical, propane, or solar, as well as other elements of the home that can affect overall energy costs.

With 35 years of experience in the residential building industry, Francis Belle has an extensive background in home construction, building science, and energy efficiency. Francis has represented Saskatchewan in the development of national standards for the next generation of high performance homes across Canada, provides advice to leading home builders' in designing for low energy use, and has been an instructor for the Heating, Refrigeration and Air Conditioning Institute of Canada (HRAI) since 2007.

Wednesday, July 19th, 2017
